Dear Sir,

Sub : Performance of Fuel Mag on our Telcon Excavator EX-210.

We had fitted Fuel Mag-Diesel Decontamination Unit on our EX-210 Excavator on 10th December, 2007 and tested it for 300 machine running hours.

We Have observed the following benefits :-

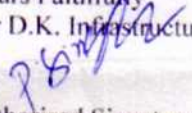

1. The Fuel Primary & Secondary Filters have been observed to be very clean as compared to earlier when our machine was without Fuel Mag. Hence the changing interval of primary & Secondary Fuel Filter has been extended there by reducing our Diesel Filter Consumption.
2. There is no Fuel oil pressure drop.
3. Diesel from the changed filter of EX-210 Excavator fitted with Fuel Mag was examined and found to be clean were as diesel from the changed filters of another Ex-210 Excavator was found to be dirty & blackish in colour there by indicating Microbial contamination in diesel.

We were not aware of these problems caused by Microbial contamination in diesel and are happy to see a big change in performance of our engine by just removing Microbial Contamination by Fuel Mag.

We would further install Fuel Mag in rest of our Machines.

Thanking you.

Yours Faithfully
For D.K. Infrastructures
